Subject: FW: 09/513,888 sequence search

I Approve this search.

The claims are drawn to polynucleotides that hybridize with high stringency, as noted by Gerald, so an internal match of a few hundred bp would reject these claims easily.

Subject: 09/513,888 sequence search

Hi Jeff,

please approve a search of SEQ ID NO: 1 (~ 9 kb human genomic DNA encoding FEZ1) and SEQ ID NO: 2 (~5.4 kb cDNA for mRNA encoded by SEQ ID NO: 1) of this application. Claims are directed to nucleic acids that are complementary to the cited sequences, sequences with at least 70% complementarity to the cited sequences and to nucleic acids that hybridize under unspecified "high stringency" conditions. Thanks for your help. Gerry
